

## ADVANTAGES

- Media bonded to the frame to eliminate air bypass.
- Plastic enclosing frame ensures filter pack rigidity and media support throughout the life of the filter, guaranteed.
- Available in a variety of sizes
- Uniform pleat separation and media exposure to airflow to ensure high dust loading.
- Lowest resistance of any high-efficiency mini-pleated filter resulting in a lower total cost of ownership.

<b>Application</b>	Any commercial, medical or industrial application where space is a premium.
<b>Frame</b>	Plastic
<b>Media</b>	Synthetic
<b>Max airflow</b>	1.25 x nominal flow
<b>Relative Humidity max</b>	30% - 70%
<b>Installation Options</b>	Rooftop air handlers, built-up filter banks, side access filter housings, furnaces and free-standing HVAC package units.
